

digiCMS

digiCMS:

digiCMS – Construction Management Software is a software solution for Real Estate companies to manage the construction process along with contractor’s management.

Using digiCMS, Real Estate companies can manage multiple projects. Companies can create contractors and assign them to projects. Companies can track every activity and progress at project site in real time.

Using this solution, the real-estate company can manage their own staff, work assignments, work progress review, communication with contractors, clients, payments, track invoices and digitally manage the construction process.

How is digiCMS different from any other system?

- We are a cloud-based platform. You don't need to invest in any hardware or software to use digiCMS
- We will provide an app for both Android and iOS hosted in your company name with your branding and logos
- Pay per month for the platform. Nominal subscription fees for using the platform
- digiCMS is modular. Choose which ever modules that you need to go live
- Manage multiple properties using one software
- digiCMS data is stored securely on Microsoft Azure cloud platform
- Integrations and customizations with existing system is done free of cost
- First time data load of the real estate company is done free of cost
- Yearly maintenance is done free of cost
- Multilingual application supporting languages like Arabic, Chinese, Malay, Indonesian, Thai and Filipino
